## Men Feel Tired, Too

While much is said about tired women it must be remembered that men also pay the penalty of overwork. When the kidneys are weak, inactive or sluggish, when one feels tired out and miserable, has the "blues", lacks energy and ambition, Foley Kidney Pills are tonic and strengthening. They act quickly. THE LITTLE RED SCHOOLHOUSE  
How well I remember the little red school house,  
And the whip that the teacher had hung on the wall,  
I can see it today, in all its grim splendor,  
And I wince when I think of the way it could fall.

I can see the stern teacher, forbidding and awesome,  
With an eye for each one of her troublesome crew,  
And I feel the cold shivers, that playing tag upon me,  
When she chanced on the picture of her, that I drew.

I can see the rough floor with its yellow pine splinters,  
That tortured my little bare feet through the day,  
And the benches all carved in a wondrous fashion,  
Where a boy and a jackknife had once held their sway.

I can see as I dream of that little red schoolhouse,  
A yellow-haired girl at the seat just ahead,  
And the braids that I pulled, when by chance it would dangle,  
And I hear yet today, all the things that she said.

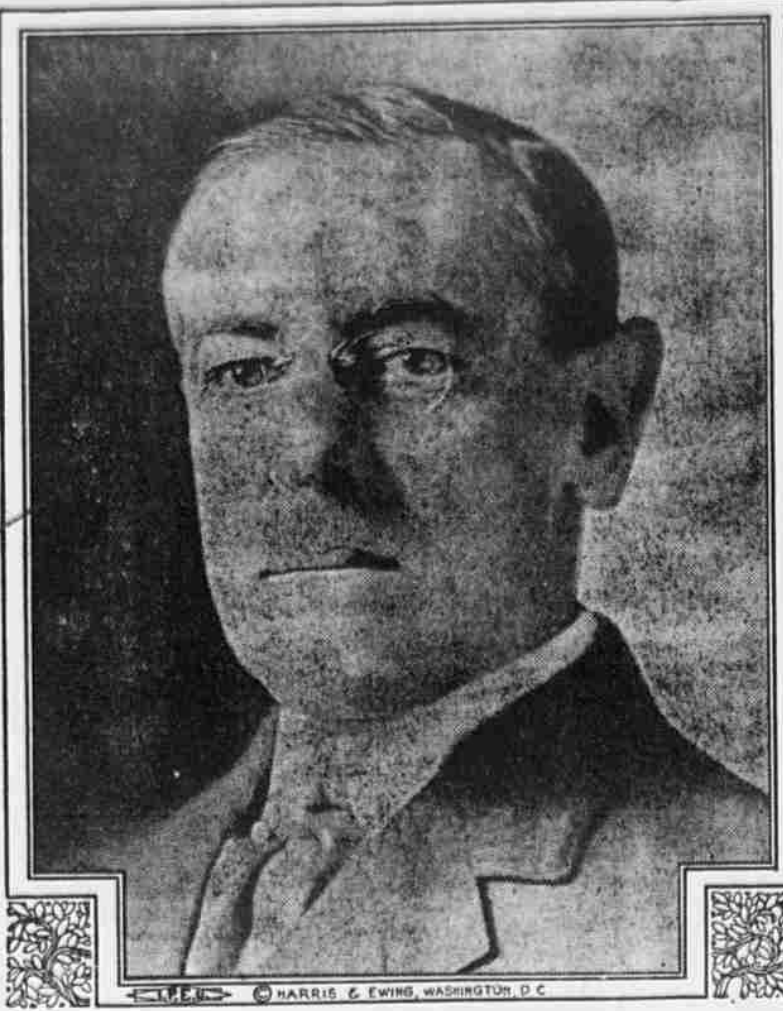

Well, the years have rolled onward,  
As years have forever,  
For nothing can turn back the days as they pass,  
But at times I will dream of that little red schoolhouse,  
And long for a smile from that yellow-haired lass.

## POULTRY AS A FARM MEAT

Handiest Form of Quick Supply at Any Time

Poultry supplies about the most convenient form of fresh meat for home killing on the farm, taken the year around, and is about 25 per cent of the total home killed meat on farms of the country.

Unexpected company usually get some kind of poultry for dinner, but if poultry is not available and the larder does not contain any other kind of meat, canned goods or vegetables have to be resorted to for the menu. For it is out of the question to rush out, catch, kill and dress a young shoot, calf or lamb for dinner.

Farm women have become adept in catching, dressing and cooking a chicken in short time.

Leaving out of consideration the advantage of having poultry to supply larder up dinners, it is worth while for the egg production, as there are no other sources of eggs, nor is there any substitute for them which has been generally accepted, even when prices reach the topmost pinnacle in the winter.

In view of these advantages, it is surprising why so many farms in this country do not raise poultry.

## Another Remedy for Mites

Any means which will close up all cracks in poultry roosts is a good form of "preparedness" against mites. One of our readers recommends coating the roosts with tallow twice a year to "fill up" all the minute apertures.

While mites are so small that they are hardly discernible, yet they can cover considerable territory in a short time and always leave the fowls before daylight to hide in some darkened place of retirement. If the roosts do not furnish a convenient lodging place they may find harbor in cracks in the henhouse walls.

Spray the walls with whitewash, in which is mixed some crude carbolic acid. Fix the roosts so there are no cracks and the mites will not cause the flock so much annoyance.

## Getting Chicks on Ground

Most poultry breeders like to get their young chicks onto the ground as soon as possible, and a small, comfortable coop with a short wire run for the mother hen can be used to advantage when the weather is not too disagreeable. Motherless chicks can have their brooder placed so the yard will be sheltered from cold winds and yet the chicks have a little runway on the ground.

## New Whitewash Formula

Persons who have trouble making wall paper stay on whitewashed walls might try the following plan: Beat the whites of four fresh eggs until they are stiff and add to a gallon of paste, which should be cooled sufficiently before adding the beaten whites so that it will not cook the eggs. This is a home made preparation.

## Food Dictator Is Named.

London.—A Berlin dispatch forwarded by way of Copenhagen says the Berlin Post announces that Gen. Groener, who according to recent report was to become head of the department of munitions, will be made dictator of economics, with absolute power to deal with exports and imports and to have control of the appointment of all officials connected with food questions. According to the food regulation board, probably will be placed under Gen. Groener unless, as expected, he prefers to retire.

## Submarine Gets Silver.

New London, Conn.—When the submarine Deutschland starts on its return trip to Germany part of its cargo will be six and a half tons of silver bullion from the mint at San Francisco, which was arrived here.
